### **Iofina Chemical Awarded ISO Certification**

Iofina plc, specialists in the exploration and production of iodine and manufacturers of specialty chemical products, is pleased to announce that Iofina Chemical Inc. ("IC"), the Company's specialty chemicals division located in Covington KY, USA, has been awarded ISO 9001:2015 certification, an internationally recognised standard that specifies requirements for a quality management system ("QMS").

To become ISO certified, IC underwent a thorough evaluation process of its QMS. This certification reinforces to all its stakeholders IC's commitment to providing consistently high-quality products and its dedication to the continual improvement of its QMS. This certification also shows that IC has strong, clearly defined procedures in place across the business, including document control, training, production, purchasing and process safety.

As well as maintaining the high standard of its products, becoming ISO certified will also see IC strive to continue challenging itself to improve as an organisation. This achievement would not have been accomplished without IC's team of dedicated employees and their commitment to a strong quality system.
